Re: House Bill 5964

Dear Chairman Meadows:

As a coalition of leading technology companies and technology trade associations, we write to express our strong support for preserving advertising and creative works exceptions, including the video game exception, in H.B. 5964. These exceptions are critical to making the bill pass muster under the First Amendment, and to providing Michiganders with free, advertising-supported Internet content.

We very much want to work with you and Representative Byrnes on this legislation, and appreciate your considering our views.

Sincerely,

Adrian Copiz
Counsel
